NOTICE TO APPLICANT

1. This is in response to the amendment filed 8/21/06. In addition, due to an administrative error, the previously mailed Notice of Allowance inadvertently indicated a mailing date of 10/23/06. This Notice of Allowance will restart the period of response as of the new mailing date of this Office Action.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

3. The application has been amended as follows:

Please change the status identifier of claims 90-97 and 99-106 from (unchanged) to (Previously presented).

Response to Amendment

4. In the amendment filed 8/21/06, the following has occurred: claims 89 and 98 have been amended and claims 107-108 have been canceled. Now, claims 89-106 are presented for examination.

5. The rejections under 35 U.S.C. 103(a) have been withdrawn by the Examiner based on changes made by Applicant to the claims.

Allowable Subject Matter

6. Claims 89-106 are allowed. The following is an examiner's statement of reasons for allowance: The primary reasons for the allowance of claim 89-106 is the inclusion of the limitations, in all of the claims which is not found in the prior art references, of utilizing an optical scanner to convert medical records into digital records, while simultaneously embedding and matrixing a unique patient identifier watermark and a unique digital physician signature watermark, the digital physician signature watermark then being compared to a stored database of digital physician signature watermarks to authenticate the digital record before outputting the record according to its' organization and raking based on chronology and clinical utility in treating a corresponding patient. The prior art teaches a system and method for outputting digital records based on authentication against a watermark (see De La Huerga, 6,408,330). The prior art also teaches a system and method for embedding a watermark simultaneously with the optical scanning of a document (see Uchida, 6,370,258). However, the prior art (and the combination of De La Huerga and Uchida in particular) fails to teach a system and method that utilizes an optical scanner to both digitize medical records and embed both a patient and physician watermark and utilize the physician watermark to authenticate the digital records before outputting based on chronology and clinical utility.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
